This drawing is not to scale it is only an Idea.

Tower can be any where from 100 to 200 feet tall which can be seen for miles.

People can ride to the very top, ~~there~~ at the very top is a Lookout area!

just beneath it would be a very fancy resturant.

There would be a charge to visit top.

Virgil

Painted aqua Blue

Tower would have a least 8 Beams (vertical) at least 2' Dia.

at night time it would be lit up from top To Bottom. It ~~would~~ will be seen for miles

The building below would be made of a Sand Stone finish outside look. I only drew two Dolphins But on the walls would be different kind's of Sea animals carved out of the stone. Animals like Dolphins, Sharks (Hammer Heads

Manatees, Pelegens, Terns etc Different Sea Birds

The building below would have different kind of gift shops small clothing stores and different kinds of Resturants some fast food.

Perhaps a Carousel in center elevators on four corners Enclosed in glass.

Windows would Be round Circles

I got the Idea
from a Light house
in Japan.
Browsing Through the
internet found it
in Enoshima Japan

Please give This Idea
~~For~~ To Architects or
Engineers working on
this project.

Tower does not
Have to be on Top
of Pier.
Just another Idea
