> Proposal for St Pete downtown pier project:
>
> Downtown St Petersburg has metamorphic into a multi cultural environment with ascetically pleasing condos, art galleries and shopping destinations. The new sundial project has enhanced the core of the downtown with future restaurants and retail shops. The various delectable restaurants along Central Avenue and Beach Drive are unique in design offering a menu to please anyone's palette. The art museums are an artist lovers dream come true and a major attraction to tourists.
>
> On that note, I believe that the pier should be an Eco-friendly individual and family visual entertainment destination that would be tranquil and serene offering an experience like non other! The high line in NYC would be a prime example of an elevated walkway combining unique seating areas, illuminated architectural landscape, rectangular pools of water and soft acoustical music. The end of the walkway is a theater style seating platform that would overlook illuminated dancing waters, enhanced with colorful lighting: the following websites are an example of what could be the future of the pier!
