Resolution No.	

A RESOLUTION OF THE ST. PETERSBURG CITY COUNCIL APPROVING THAT \$475,000 OF FUNDS RESERVED FROM THE BP SETTLEMENT PROCEEDS BE APPROVED AS A SUPPLEMENTAL APPROPRIATION FROM THE UNAPPROPRIATED BALANCE OF THE GENERAL FUND (0001), DERIVED OF SETTLEMENT FUNDS FROM THE 2010 DEEPWATER HORIZON OIL SPILL (BP SETTLEMENT), TO THE MAYOR'S OFFICE (0001-020) FOR THE IMPLMENTATION OF A CITY-WIDE TREE PLANTING PROGRAM; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the Sustainability Vision of the City of St. Petersburg (City) is a city with the capacity to endure by finding the balance between environmental stewardship, economic vitality and social equity; and

WHEREAS, the City's Sustainability Mission Statement is to make St. Petersburg the city to work, live and play through innovative and collaborative sustainability practices; and

WHEREAS, the City's Sustainability Core Values are community collaboration and partnerships, creativity and quality outcomes, cost effective economics, environmental stewardship, and leadership in innovation; and

WHEREAS, tree planting and protection and urban forestry contribute to the implementation of all the City's stated Sustainability Goals: the net zero energy, protection and enhancement of natural systems, the protection and promulgation of shade and green space, sustainable built environment practices, safe and efficient multimodal transportation networks, improvement of our local economy, and a healthier community; and

WHEREAS, trees and tree canopy have been shown to sequester carbon, improve air and water quality, and reduce energy usage; and

WHEREAS, the City is the recipient of funds in settlement of the 2010 Deepwater Horizon oil spill in the Gulf of Mexico (BP Settlement); and

WHEREAS, on February 18, 2016, the Energy, Natural Resources and Sustainability Committee (ENRS) voted unanimously to recommend approval of a supplemental appropriation of \$500,000 of BP Settlement funds from the unappropriated balance of the General Fund to the City Council of St. Petersburg, Florida for the purpose of establishing and implementing a new Tree Planting Program (Program); and

WHEREAS, on May 19, 2016, the City Council voted 7-1 to approve an appropriation of \$25,000 from the unappropriated balance of the General Fund for the establishment and implementation of the Program, while reserving \$475,000 for the further implementation and completion of the Program; and

WHEREAS, on June 15, 2017, ENRS voted unanimously to recommend the release of the \$475,000 reserved to a supplemental appropriation to the General Fund to move forward with final fieldwork and purchase of trees of; and

WHEREAS, the Office of Sustainability, under the Mayor's Office shall be the lead department in the establishment and implementation of the Program, but shall enlist and allocate funds to the Parks and Recreation Department in achievement of the goals of the Program, including, but not limited to, the procurement and planting of trees.

NOW THEREFORE BE IT RESOLVED by the City Council of St. Petersburg, Florida that there is hereby approved the following supplemental appropriation from the unappropriated fund balance for fiscal year 2017:

General Fund (0001)

Mayor's Office (0001-020)

\$475,000

BE IT FURTHER RESOLVED that this \$475,000 appropriation shall be used exclusively for the establishment and implementation of the Tree Planting Program.

This Resolution shall become effective immediately upon its adoption.

Approved as to form and content:

City Attorney (Designee)

Budget Department

# MEMORANDUM City of St. Petersburg City Council Meeting of July 20, 2017

**To:** The Honorable Darden Rice, Chair and Members of City Council

**Date:** July 7, 2017

Subject: A RESOLUTION OF THE ST. PETERSBURG CITY COUNCIL

APPROVING THAT \$475,000 OF FUNDS RESERVED FROM THE BP SETTLEMENT PROCEEDS BE APPROVED AS A SUPPLEMENTAL APPROPRIATION FROM THE UNAPPROPRIATED BALANCE OF THE GENERAL FUND (0001), DERIVED OF SETTLEMENT FUNDS FROM THE 2010 DEEPWATER HORIZON OIL SPILL (BP SETTLEMENT), TO THE MAYOR'S OFFICE (0001-020) FOR THE IMPLMENTATION OF A CITY-WIDE TREE PLANTING PROGRAM; AND PROVIDING AN

EFFECTIVE DATE.

### **BACKGROUND**

In an effort to increase the city's tree canopy which also contributes to increased environmental, health, and economic benefits, some preliminary work was completed by Former Mayor David Fischer and the Parks & Recreation Department to identify tree planting areas on city property and right-of-way. The BP Settlement was identified as a sensible funding source to re-initiate tree plantings and contribute to preliminary steps for long-term urban forestry planning. Councilmember Nurse referred a resolution to allocate \$500,000 of BP Settlement funds.

Before moving forward with plantings, the Office of Sustainability contracted a certified arborist to conduct site evaluations of approximately twenty (20) miles of roadway corridor for the purposes of created a foundation of urban forestry, diversity, and survival criteria that may be used as resources are available to move in the direction of a broader urban forestry program. The site evaluation work included fieldwork to observe overhead utilities, spacing, and existing conditions. Preliminary evaluations of underground utilities based on city GIS files, preliminary coordination with Transportation & Parking, Engineering, and Water Resources Departments were also conducted to coordinate planning efforts and construction scheduling.

A public meeting was held on May 3, 2017 at J.W. Cate Recreation Center to go over the findings and tree categories and to gather additional input from citizens. Additional community

input was gathered through City Council members and emails from several neighborhoods. That input was used with departmental coordination to identify corridor areas additional to what was originally identified by Dave Fischer, Tree Czar. Only part of the community input areas could be evaluated in the field for this scope of work. Areas that were beyond scope and budget to will be kept for future tree planting purposes.

### **RESULTS**

The results show that about 2,185 trees may be planted at the cost of about \$1,984,745 or an average of \$909/tree for the corridors evaluated. The cost/tree includes purchase, establishment, and maintenance for up to 2 years.

Additional input from the community and the ENRS committee asked that the city direct the contractor to minimize planting of palms and Crepe Myrtles. Palms are expensive and provide less shade, so using them where it is the only best option provides an opportunity for bringing down the average cost per tree. In addition, Live Oaks are in high demand and may be difficult to purchase at the prescribed size. Smaller sizes provide opportunity for cost-savings, but may also require some extra maintenance. A check with the city's contractor and a brief review of recent city tree purchases show this cost estimate to be in line with recent market trends.

The technical team created a tiered approach balancing funding among city council districts, need, and field observations as an option below. Additional funding could be prioritized as listed in Tier 2 below, may need to be partial implementation for longer corridors. Other approaches may be taken considering key factors like council district, investment in large trees vs. accent trees, most need, and enhancement of planned bike/pedestrian facilities.

Any recommended approach or priorities at this time may be changed by additional infrastructure project updates, underground utilities research results, and availability and cost of trees. Table 1 below summarizes the Tiered recommendations.

**Table 1. Implementation Approach – Option 1**

### NEW PROPOSAL/PARTNERSHIP OPPORTUNITY FOR TREE DIVERSITY

During this process to infuse some resources into the city's tree canopy, the citizen-led St. Petersburg Sustainability Council (SPSC), city staff, and other stakeholders reached out to City of Tampa, UF-IFAS Forestry Program and others for assistance. Urban foresters from around the state then visited St. Petersburg for various tree-related events last year.

This year, the state diversity working group of experts has invited a few cities to participate in testing some species for diversity. Graduate students and experts have asked if the city would like to identify two plots for planting test trees. The city would pay around \$500 for the trees, and would plant and maintain them with assistance from UF-IFAS staff. Staff and group are working through final complexities of going outside traditional paths for tree purchases. If the city is able to work through those issues in the timeframe, staff recommends the following:

✓ It is recommended that no more than \$500 of the \$481,600 be used to fund the test plots. Other funding may come from Golf Course or other operations making the BP Settlement contribution less than \$500.

### **NEXT STEPS**

To close out the site evaluation contract and begin purchasing and planting trees, there are the following next steps:

- City Council approval for allocating the remaining \$475,000 of reserved funds (\$481,600 total for tree plantings).
- Contractor finalizes evaluation with underground utility verification and other factors asneeded.
- Outreach to residents and business to gain approval for plantings that may be in front of homes and residences that those property owners will be responsible for.
- Plant, maintain, and track maximum number of diverse tree species for money allocated.
- Report on lessons learned, urban forestry management moving forward including staff and financial resources.

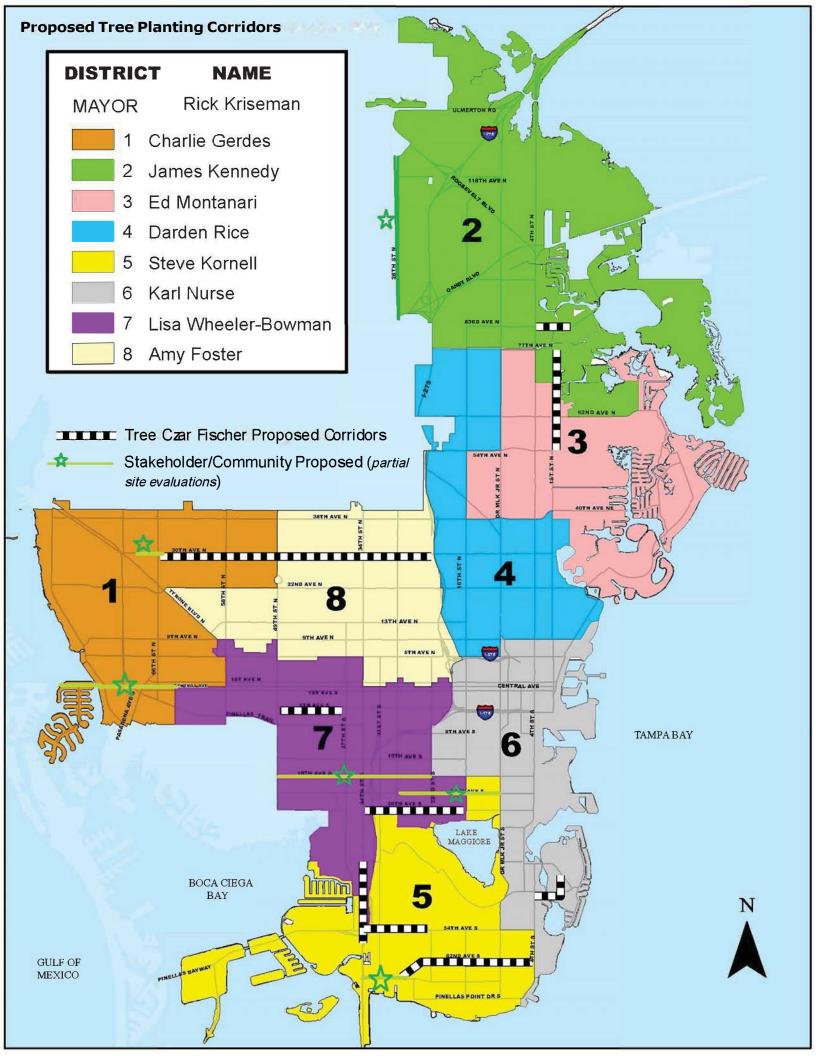

## MATERIALS/ATTACHMENTS INCLUDED

Included in this package are the following draft deliverables:

- Site Evaluation Map with all identified alternate corridors shown with green line and star. *Note: Only a small portion of the alternates were evaluated in the field.*
- Tree Selection Matrix tree categories acceptable in the evaluated corridors
- Site Evaluation Matrix detailed results of fieldwork and preliminary utility and infrastructure coordination
- Corridor Cost Summary
- Sample of a planting plan page
