For further information please call 727-893-7942 or FAX us at 727-551-3289.

REGULAR MULCH to be delivered consists of material brought to the City Brush Sites and consists mostly of local plant materials which have been shredded and processed using windrow sanitization. Windrow sanitization is the process by which materials are placed in a long narrow row, turned for aeration, and maintained at or above 131°F for 3 days in order to eliminate weed seeds, insects, and plant pathogens.

LOG MULCH to be delivered consists of material brought to the City Brush Sites and consists mostly of local hardwood tree materials, including logs and stumps which have been shredded.

DOUBLE GROUND LOG MULCH to be delivered consists of material brought to the City Brush Sites and consists mostly of local hardwood tree materials, including logs and stumps which have been shredded two times. By shredding the material twice, it insures a more consistent size throughout the product.

SOIL BUILDER to be delivered is made from screened mulch, consisting of local plant materials brought to the City Brush Sites and which have been shredded and processed using windrow sanitization. Windrow sanitization is the process by which materials are placed in a long narrow row, turned for aeration, and maintained at or above 131°F for 3 days in order to eliminate weed seeds, insects, and plant pathogens. This process is continued for a minimum of one year after which the material is screened. ***This product is not a compost. This product is a soil amendment sold for its properties to retain water and build soil organic matter. It is not a plant fertilizer and there is no guarantee that amendment to the soil will affect or stimulate plant growth.***
