To the pier committee:

The "Sunshine City" should take advantage of the newest technology to build a wonderful building using solar power. Make it as energy sufficient as possible, Have a fine moderate priced restaurant with a wonderful view of the bay and the city as we have had in the old pier building. On the lower floor a game room where people could play cards, electronic games, etc. and buy snacks. Perhaps an ice cream shop. Would it be possible to view the marine life of the bay in it's natural state? A glass floor perhaps.?

*Kelly Garcia*
