PROJECT SUMMARY

As part of the Complete Streets initiative, the City of St. Petersburg will resurface and reconfigure Dr. M.L. King, Jr. Street from approximately 4th Ave. N. to 34th Ave. N. to promote safe, continuous traffic and pedestrian flow while supporting business needs along the corridor. Bike lanes will be added from 4th Ave. N. to 30th Ave. N. by re-purposing one of the five travel lanes. **Construction is projected to begin in Sept. 2018** with further improvements to the corridor, including enhanced crosswalks with medians, to take place subsequent to the resurfacing.

Since late 2017, city transportation planners have gathered suggestions from residents and business owners in the surrounding neighborhoods to identify ways of improving safety while maintaining reasonable traffic flow along the corridor for motorists, bicyclists and pedestrians.

PROJECT UPDATES

**Aug. 23, 2018**
City announced plans to move forward with the proposed plan. Construction is projected to begin in Sept. 2018.

**Aug. 15, 2018**
An overview of the project was provided at the Council of Neighborhood Associations (CONA) monthly meeting.

**June 5, 2018**
An overview of the economic impact and general project plan was provided to the MLK Street Business District.

**April 5, 2018**
As a result of community feedback and transportation data, the city presented an alternative plan to citizens during a public meeting.

**November 2017**
First public meetings began.
