

PUBLIC WORKS NOTICE 12/12/2018

Roofing work to reduce travel lanes along First Avenue North

Drivers along First Avenue South will face lane closures from 13th to 10th Streets South between 7 a.m. and 3:30 p.m. on Tuesday, December 18, 2018.

The use of a crane to perform work on the roof of 1010 Central will force the closure of one lane of traffic from 13th Street east to 11th Street, where the closure will increase to two lanes to work around the crane. Once traffic is past the crane in the 1000 block of First Avenue South (approaching MLK Street South) all lanes will be open.

While detours and modification of traffic patterns will be fully signed, the City of St. Petersburg recommends that drivers find an alternative route during the construction times.
