

PUBLIC WORKS NOTICE 12/6/2018

Water Main installation to close lane along First Avenue North downtown

St. Petersburg, Fla. (December 6, 2018) – Drivers along First Avenue North will face detours and lane closures between Second and Third Streets North as new water mains are installed December 10-21, 2018.

This project is a planned closure and will include excavation of the old pipe and installation of new water mains to service downtown customers. The work is scheduled to begin along the right (curb) lane at 8 am Monday, December 10, and continue through the close of business the next Friday, December 21.

Detours will also be in effect along Third Avenue between Fourth and Sixth Streets South as the milling and paving operations are underway.

While detours and modification of traffic patterns will be fully signed, the City of St. Petersburg recommends that drivers find an alternative route during the construction times.
