RE: PHASE I ENVIRONMENTAL SITE ASSESSMENT - Vacant Land - “Parcel B” - SW Corner of 4th St. South and 11th Ave. South - Parcel ID #'s 30/31/17/77418/000/0010 & 30/31/17/77400/000/0010 - St. Petersburg - Pinellas County - Florida

Dear Mr. Psarakis:

Greenfield Environmental, Inc. (GE) has completed a Phase I Environmental Site Assessment (ESA) of the above referenced property located in St. Petersburg, Florida.

This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. This report documents the environmental concerns identified on the subject site and addresses the associated risks to the environment. Greenfield Environmental acknowledges the fact that the City of St. Petersburg is relying on the information contained in this Phase I ESA report to assess the environmental condition of the subject property and the scope of work was sufficient in Greenfield Environmental's opinion to uncover potential Recognized Environmental Conditions (RECs) at the subject property pursuant to the above standards. This ESA report was prepared for and is certified to the City of St. Petersburg for their exclusive use. Greenfield Environmental warrants that this Phase I ESA was conducted in accordance with procedures, practices and standards generally accepted and customary in the consultant’s profession for use in similar assignments.

In the professional opinion of Greenfield Environmental, Inc., an appropriate level of inquiry has been made into the current and previous ownership and uses of the subject property consistent with good commercial and customary practices in an effort to minimize liability, and evidence or indication of Recognized Environmental Conditions (RECs) has been identified (See Assessment Summary). Should you have any questions, please feel free to call us at (727) 896-1266.

Respectfully submitted,
Greenfield Environmental, Inc.

Mr. James E. Greenfield  
Principal

Encl.

1.0 ASSESSMENT SUMMARY

Based on the standardized research methods and resultant information contained within this Phase I Environmental Site Assessment, Greenfield Environmental has identified the following Recognized Environmental Conditions (RECs) in accordance with the EPA's All Appropriate Inquiry (AAI) Standard. A REC is defined by the above standard as an identified condition indicative of releases or threatened releases of hazardous substances, and in the case of inquiries conducted for persons identified in §312.1(b)(2), conditions indicative of releases and threatened releases of pollutants, contaminants, petroleum and petroleum products, and controlled substances (as defined in 21 U.S.C. 802) on, at, in, or to the subject property.

Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed the following evidence of Recognized Environmental Conditions (REC's) in connection with the subject property:

(1) The presence of a historic service station located at 1038 4th Street South, approximately 0.069 miles northeast of the subject property. This site is currently a parking lot for the University of South Florida - St. Petersburg. A service station was located on this site from the mid-1950's to the mid-1980's. Regulatory records for the site indicate that two (2) fuel underground storage tanks (UST's) were abandoned in place at the site. No assessment records were available for review. Based on the potential that these UST's may have had historic leaks and no assessment records were available for review, this site is considered a REC at this time.

(2) The historic presence of an automotive repair facility located at 1041 4th Street South, approximately 0.071 miles north-northeast of the subject property. This site is currently a vacant thrift store. An automotive repair facility was located on this site in the mid-1930's. No regulatory or assessment records were available for review. Based on the potential usage and storage of automotive fluids at this facility, this site is considered a REC at this time.

(3) The historic presence of the Central Cleaners plant (a.k.a. Colony Cleaners) located at 1160 4th Street South, approximately 0.047 miles southeast of the subject property. This site is currently part of a construction staging lot for road work that is occurring nearby. A large drycleaning and laundering facility was located on this site from the mid-1950's to the late 1970's. No regulatory or assessment records were available for review. Based on the potential usage and storage of drycleaning constituents at this facility, this site is considered a REC at this time.

(4) The historic presence of an automotive repair facility located at 1166 4th Street South, approximately 0.049 miles southeast of the subject property. This site is currently part of a construction staging lot for road work that is occurring nearby. An automotive repair facility was located on this site from the mid-1950's to the mid-1980's. No regulatory or assessment records were available for review. Based on
the potential usage and storage of automotive fluids at this facility, this site is considered a REC at this time.

2.0 INTRODUCTION

2.1 Purpose
This Phase I ESA was performed in order to assess the site for existing or threatened contamination from sources listed within this report. This Phase I ESA was performed in order to identify any Recognized Environmental Conditions (REC's) as defined within the EPA's All Appropriate Inquiry (AAI) Standard. This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. This Phase I ESA was performed under the direct supervision of Environmental Professional, Mr. James E. Greenfield.

The site visit was performed on September 16, 2013 by Nick Ellerman. Mr. Ellerman currently holds a Bachelor of Science degree in Environmental Science & Policy from the University of South Florida. Mr. Ellerman has environmental-related work experience since 2005 and experience in assessing the risks associated with real-property transactions since 2006. The site inspection was conducted with accompaniment by Mr. James Greenfield. This Phase I ESA was performed in order to assess the site for existing or threatened contamination from sources listed in Section 8.0 of this report. See Section 9.0 for a description of the scope of work and information sources used to perform the assessment.

Work conducted during the course of this Phase I ESA was completed under the direct supervision of James E. Greenfield. Mr. Greenfield holds a Bachelor of Arts degree in Biology from the University of South Florida. Mr. Greenfield has environmental-related experience in assessing the risks associated with real-property transactions since 1989.

2.2 Detailed Scope Of Services
The site inspection consisted of visual observation and photographic documentation of the subject property, and review of the following items: environmental setting, site geology and hydrology, on-site wells, aboveground storage tanks, underground storage tanks, on-site surface waters, impoundments and other land uses, septic systems, leach beds, or other subsurface structures, drums or containers, hazardous substance or petroleum product use and storage, hazardous waste disposal / storage practices, solid or liquid waste disposal practices, a limited PCB containing transformer survey, past usage of land, aerial photograph review going back to when the subject property appeared to be virgin with no on-site structures apparent, if applicable a 50-year chain of title search, environmental lien search / publicly recorded instruments within the past 50 years, historic city directories (if available), prior environmental assessments (if available), Sanborn Fire Insurance Maps (if available); review soil surveys, Geologic Maps of Florida, USGS Quadrangle Map, walk or drive around of adjacent properties (as possible), interview(s) with one or more persons knowledgeable about present and past use of the land (readily accessible), record review of NPL sites, De-Listed NPL sites, CERCLIS sites, CERCLIS NFRAP sites, RCRA TSD sites,
RCRA CORRACTS sites, RCRA Generator sites, ERNS sites, Federal / State / Tribal Institutional Control/Engineering Control Registries, State and Tribal List of Hazardous Waste facilities, State and Tribal equivalent NPL sites, State and Tribal equivalent CERCLIS sites, State and Tribal Aboveground Storage Tanks (AST) sites, State and Tribal Underground Storage Tank (UST) sites, State and Tribal Leaking Underground Storage Tank (LUST) sites, State and Tribal Landfill and or Solid Waste sites, State and Tribal Brownfields sites, State and Tribal Voluntary Cleanup sites and record review of state and local government environmental enforcement data bases and examination of agency files on the property and adjacent properties, review of environmental permits if disclosed by owner or operator and the assembly of the environmental assessment report, including recommendations for additional investigation (if necessary). No subsurface investigation was conducted as part of this Phase I ESA.

2.3 Significant Assumptions

It is important to note that all but an exhaustive investigation might fail to locate buried, covered over or localized surficial events of hazardous materials or wastes on-site that are not reasonably visible or suspected at the ground surface. The client should realize that the subject property, which in our opinion, did not exhibit evidence that toxic or hazardous wastes were at the ground surface during our site inspection and field work, except as qualified herein, could later be impacted due to natural phenomena, human intervention, on-site pollution sources or contamination due to adjacent properties. These occurrences are beyond our control. Greenfield Environmental assumes that there are no hidden or unapparent environmental conditions of the site, subsoil, groundwater, structures or surroundings, which would have an adverse effect on the subject property, whether the source is on-site, adjacent, or in the nearby surrounding area. The purpose of this Phase I ESA was not to provide an operational audit of any businesses at the site, if any, which would determine their compliance with regulatory requirements that may affect them.

Information, estimates, and opinions furnished to Greenfield Environmental contained in this report, were obtained from sources that are considered and assumed to be reliable, and believed to be true and correct. Greenfield Environmental assumes no responsibility for any inaccuracies in such items which may be revealed as a result of subsequent action, either by Greenfield Environmental or others. These occurrences are beyond our control.

Any site plans or drawings show approximate dimensions and are included in this report to assist the client in visualizing the site and the surroundings, and not to give a necessarily accurate dimensional representation of the site. No survey was conducted on the subject property. Greenfield Environmental or its representative has made no agreement to give legal testimony nor to appear in court or other hearings, formal or informal, as part of the PSA with the client or any party involved with the property. The client may make separate arrangements with Greenfield Environmental for testimony required now or in the future. Conclusions drawn from the results of this assessment are limited by the methods used and do not represent a warranty that all areas within the subject property are in the same condition. All portions of this report, including the assessment summary and limitations, are an integral part of this Phase I ESA and should not be separated from any other portion of the report.

2.4 Limitations and Exceptions
Excluded from said contract is any actual physical determination or delineation of wetlands on the subject property, actual testing for radon gas on the subject property; the existence of any endangered species within the property; the location of any well field protection areas; urea formaldehyde insulation, or testing for lead within any structures on the subject property; or the existence of the "sick-building" syndrome within any structure on the subject property, determination of compliance with Activity and Use Limitations (AUL's), lead in drinking water determination, regulatory compliance, cultural and historical resources, industrial hygiene issues, health & safety issues, other ecological issues, indoor air quality issues, determination of on-site biological agents and mold issues. This report has presented and discusses the environmental condition of the subject property as of the date of our site inspection only and does not imply that the subject property will remain in that condition in the future. Assessment of the threat of contamination from adjacent properties is limited to a non-intrusive inspection and visual observations of the adjacent properties from the subject property and surrounding or adjoining properties, and a review of the records listed. Information for this assessment was obtained through a site visit, interviews with employees at the agencies or businesses listed, and the review of documents listed.

2.5 Special Terms and Conditions
This Phase I ESA was conducted in accordance with the scope and limitations of the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312), in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05, and in accordance with procedures, practices and standards generally accepted and customary in the consultant's profession for use in similar assignments.

2.6 User Reliance
This Phase I ESA report, conducted at the above-captioned site by Greenfield Environmental was prepared for and is certified to the City of St. Petersburg. Furthermore, the City of St. Petersburg can rely entirely on this report as part of their due diligence process. The use of this report by an unauthorized third party is done so at their own risk.
3.0 SITE DESCRIPTION

3.1 Site Location and Legal Description
The subject property, approximately 2.5 acres in size, consists of two (2) vacant parcels. The subject site is located in a residential/commercial area in Section 30, Township 31, Range 17 in Pinellas County, Florida. See Appendix I for a site vicinity map showing the general area of the subject site.

According to Pinellas County Property Appraiser records, the Parcel ID number is as follows:

West Parcel: ROYAL POINCIANA KAMMAN PART. REP. LOT 1

East Parcel: ROYAL POINCIANA LOTS 1,2,3,4,5 AND 6

See Appendix II for a site plan showing the significant features of the subject property.

3.2 Site and Vicinity General Characteristics
The subject site currently consists of vacant, grassy land. The immediate area around the subject site is characterized by residential and commercial properties. Access to the subject site is via 4th Street South and 11th Avenue South.

3.3 Current Use of the Property
The property is currently undeveloped and is listed for “Vacant Commercial Land” usage.

3.4 Description of Structures, Roads and Other Improvements on the Property
No structures exist on the subject property. A dirt path was observed on the east portion of the site where the former alley is believed to have been.

3.5 Heating & Cooling Systems / Sewage Disposal / Source Of Potable Water
No structures exist on the subject property.

3.6 Current Use Of the Adjoining Properties
Our representative observed the adjacent land uses during the time of the site visit by traversing the area around the property.

Brooker Creek is present along the west and south boundaries of the subject property. The adjacent properties to the north (across 11th Ave. S.) consist of single family residences and a vacant thrift store. The adjacent properties to the south (across Brooker Creek) consist of an apartment building and a commercial strip mall. The adjacent property to the east (across 4th St. S.) consists of a road construction staging lot.

Photographs of the subject property and its surroundings are included as Appendix III.
4.0 USER PROVIDED INFORMATION

4.1 Environmental Liens or Activity and Use Limitations (AUL’s)
As part of the User Information requirements for this Phase I ESA, an Environmental Lien Search for the subject site was conducted by Pinellas Park Title Co. The results of the search were forwarded to Greenfield Environmental and did not identify any Environmental Liens attached to the subject site.

On September 30, 2013 a conversation was conducted with Ms. Evelyn Cary of Pinellas Park Title Co. She stated that no Environmental Liens attached to the subject property were discovered during the records search. A copy of the e-mail from Ms. Cary confirming the results of the Environmental Lien Search is enclosed in Appendix VI.

4.2 Specialized Knowledge
Pursuant to ASTM E 1527-05, user supplied information in the form of User Questionnaires were forwarded to Greenfield Environmental. These questionnaires can be found in Appendix VIII. The questionnaires were completed by Mr. Mike Psarakis, Senior Real Estate Coordinator with the City of St. Petersburg, and Mr. Scott Nolin, Executive Director of Facilities Management at All Children’s Hospital. The questionnaires did not reveal any issues that would indicate Recognized Environmental Conditions (REC’s). The users have not disclosed any specialized knowledge pertaining to the subject property or surrounding areas or properties that might be material to identifying any Recognized Environmental Conditions in connection to the subject site.

Prior Assessment Activities
A Phase I ESA report, dated September 28, 1995, was conducted by The Genstar Corporation on behalf of the current property owner, All Children’s Hospital, and forwarded to GE by Mr. Scott Nolin. This report was reviewed for informational purposes only.

4.3 Commonly Known or Reasonably Ascertainable Information
No other significant information pertaining to the subject site was discovered during this Phase I ESA which would be indicative of a potential release or threatened release.

4.4 Valuation Reduction for Environmental Issues
The prospective property owner has not disclosed or provided any information regarding the relationship of the purchase price for the property to its fair market value based on any contamination issues.

4.5 Owner, Property Manager, and Occupant Information
Greenfield Environmental interviewed Mr. Scott Nolin, Executive Director of Facilities Management at All Children’s Hospital. Mr. Nolin did not provide any specialized knowledge pertaining to the
subject property or surrounding areas or properties that might be material to identifying any Recognized Environmental Conditions in connection to the subject site.

4.6 Reason for Performing Phase I ESA
This Phase I ESA is being conducted in conjunction with the potential purchase of the subject site by the City of St. Petersburg. This Phase I ESA was performed in order to assess the subject property for existing or threatened contamination from the sources listed within this report.
5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources
Records from regulatory and enforcement agencies from Federal, State, Tribal, Regional and Local County agencies were obtained regarding information, registrations, investigations, violations, spills, complaints or enforcement actions relating to subject property, adjacent properties and for properties within a 1-mile radius of the subject property’s approximate location. All distances of the sites listed in the database report, in relation to the subject site, are approximations.

Environmental Data Resources (EDR) located in Milton, Connecticut was engaged by Greenfield Environmental to review several data base lists which are generated by the FDEP and the USEPA which identify and locate facilities that are regulated or tracked by the FDEP and the USEPA; and ones which may transport, store, generate, treat or dispose of hazardous substances and wastes. The information from these various lists, each identified facility with a USEPA or FDEP designation that was within a 1-mile radius of the subject property’s approximate location was then plotted on an area map. The environmental records mentioned above are the Standard Environmental Record Resources that are listed within the EPA’s AAI standard and the ASTM E1527-05 practice. The above data search can be found in Appendix V of this report.

NPL Sites
The USEPA’s National Priorities List (NPL) was checked for any sites on the subject property or adjoining properties. The NPL is a national list of abandoned or uncontrolled hazardous waste sites which have been scored by USEPA according to a hazard ranking system that assesses the health and environmental threat posed by sites with confirmed contamination. The NPL is used by the USEPA to prioritize sites scheduled for cleanup action.

Subject Property
The subject property is not currently identified as a NPL site.

Surrounding Properties / 1-Mile Radius
No NPL sites are located within a 1-mile radius of the subject property.

De-Listed NPL Sites
The USEPA’s De-Listed National Priorities List (NPL) was also checked for any sites on the subject property or adjoining properties which have been removed from the above database.

Subject Property
The subject property is not currently identified as a De-Listed NPL site.
Surrounding Properties / 1/2-Mile Radius
No De-Listed NPL sites are located within a 1/2-mile radius of the subject property.

CERCLIS and CERCLIS NFRAP Sites
The CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Index System) is a list of sites that the USEPA is investigating for an existing or potential release of hazardous substances. However, USEPA advises that the list contains only those sites that have been brought to the attention of USEPA, and therefore, it cannot claim that the list contains all potential hazardous waste sites that may exist. CERCLIS NFRAP sites are CERCLIS Sites that may still be contaminated, however, the EPA has No Further Remedial Action Planned for these sites.

Subject Property
The subject property is not currently identified as a CERCLIS or CERCLIS NFRAP site.

Surrounding Properties / 1/2-Mile Radius
The following facility was found on the CERCLIS NFRAP list within a 1/2-mile radius of the subject site:

<table>
<thead>
<tr>
<th>Site Name</th>
<th>Location</th>
<th>Distance / Direction From Site</th>
</tr>
</thead>
<tbody>
<tr>
<td>Resource Recovery of America</td>
<td>100 14th Ave S</td>
<td>0.345-mi / ESE</td>
</tr>
</tbody>
</table>

Based on this site’s distance from the subject site and the direction of groundwater flow, this site does not pose an environmental risk to the subject site.

RCRA CORRACTS Sites
The USEPA RCRA CORRACTS is a USEPA data base which identifies hazardous waste handlers with RCRA corrective action activity.

Subject Property
The subject property is not currently identified as a RCRA CORRACTS site.

Surrounding Properties / 1-Mile Radius
No RCRA CORRACTS sites are located within a 1-mile radius of the subject property.

RCRA TSD Sites
The RCRA TSD list is a USEPA data base which stores records and information on facilities which Treat, Store or Dispose of hazardous waste and substances.

Subject Property
The subject property is not currently identified as a RCRA TSD site.
Surrounding Properties / 1-Mile Radius
No RCRA TSD sites are located within a 1-mile radius of the subject property.

RCRA Generator Sites
The Resource Conservation and Recovery Act Index System list (RCRIS) is a federal database maintained by the USEPA containing information regarding RCRA (Resource Conservation and Recovery Act) facilities which generate and transport hazardous waste, and facilities which treat, store or dispose such waste. Inclusion on RCRIS does not necessarily indicate contamination, but rather the potential for contamination due to the presence and handling of hazardous substances.

Subject Property
The subject property is not currently identified on the USEPA RCRA Generator list.

Surrounding Properties / 1/4-Mile Radius
Two (2) facilities were found on the RCRA Generator list within a 1/4-mile radius of the subject site:

<table>
<thead>
<tr>
<th>Site Name</th>
<th>Location</th>
<th>Distance / Direction From Site</th>
</tr>
</thead>
<tbody>
<tr>
<td>Echelon Real Estate</td>
<td>1162 4th St S</td>
<td>0.048-mi / SE (CESQG)</td>
</tr>
<tr>
<td>Florida Power Corp - Bayboro Plant</td>
<td>1300 3rd St S</td>
<td>0.170-mi / SE (CESQG)</td>
</tr>
</tbody>
</table>

Based on records reviewed, these sites’ distances from the subject site and the direction of groundwater flow, these sites do not pose an environmental risk to the subject site.

Federal Institutional Control / Engineering Control Registries
Institutional Controls or Engineering Controls that have been recorded in public property records due to the presence of on-site contamination or likely presence of on-site contamination due to historical activities or operations on the subject site are contained within this database.

Subject Property
The subject property is not currently identified within any Institutional Control or Engineering Control Registries.

Surrounding Properties / 1/2-Mile Radius
No Institutional Control or Engineering Control Registries sites are located within a 1/2-mile radius of the subject property.

ERNS Sites
The Emergency Response Notification System is a USEPA database which stores records and information on facilities which have had reported spills or releases of oil and hazardous substances.

Subject Property
The subject property is not currently identified in the USEPA ERNS list.
Surrounding Properties / 1/8-Mile Radius
No USEPA ERNS sites are located within a 1/8-mile radius of the subject property.

State / Tribal / Local / Regional Records Reviewed
The following reference sources are published by the Florida Department of Environmental Protection and were reviewed by Greenfield Environmental:
- Registered Storage Tank list (UST/AST)
- Leaking Registered Storage Tank list (LUST/LAST)
- State Spills 90 list
- State/Tribal list
- Solid Waste or Landfill Facilities list (SWL)
- Registered Drycleaning Facilities list
- Florida Drycleaning Solvent Cleanup Program Priority Ranking list
- Voluntary Cleanup Sites list (VCP)
- State Engineering/Institutional Controls (EC/IC)
- Brownfield Sites list

These reports generally present information regarding industrial or commercial facilities and the presence or potential for contamination due to hazardous substances / wastes or petroleum products.

Subject Property
The subject site was not found on the State Registered Storage Tank list:

Surrounding Properties / 1/4-Mile Radius
The following ten (10) facilities were found on the State Registered Storage Tank list within a 1/4-mile radius of the subject site:

<table>
<thead>
<tr>
<th>Site Name</th>
<th>Location</th>
<th>Distance / Direction From Site:</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

| Lower Elevation            |                   |                                 |
| Talquin Development        | 1135 3rd Street S | 0.128-mi / ESE                 |
| Salvation Army Emerg       | 1400 4th Street S | 0.197-mi S                     |
| Southside Car Wash         | 1461 4th Street S | 0.199-mi / S                   |
| Lazzara Oil Co-Wareh       | 1330 2nd Street S | 0.241-mi / ESE                 |
| Bayboro Station            | 263 13th Avenue S | 0.123-mi / SE (AST)            |
Based on records reviewed and its proximity to the subject site, the former service station located at 1038 4th Street South is considered a REC.

Based on records reviewed, these sites’ distances from the subject site and the direction of groundwater flow, the remaining listed sites do not pose an environmental risk to the subject site.

**Subject Property**
The subject site was not found on the Leaking State Registered Storage Tank list.

**Surrounding Properties / 1/2-Mile Radius**
The following twenty-one (21) facilities were found on the Leaking State Registered Storage Tank list within a 1/2-mile radius of the subject site:

<table>
<thead>
<tr>
<th><strong>Site Name</strong></th>
<th><strong>Location</strong></th>
<th><strong>Distance / Direction From Site</strong></th>

</table>

Based on these sites’ distances from the subject site and the direction of groundwater flow, these sites do not pose an environmental risk to the subject site.

**5.11 Review of Pertinent Regulatory Files**
Files were reviewed at the Florida Department of Environmental Protection (FDEP) Southwest District Office, the Data Management System maintained by the FDEP (OCULUS) and/or the City of St. Petersburg to determine the potential threat of contamination from the facilities in closest proximity to the subject property due to the migration of hazardous materials / wastes or petroleum products in the groundwater or soil. Files reviewed revealed the following information:

*Reb’s Station aka Rickert’s Texaco Service (Facility Site ID #52-8515502)* is a former service station located approximately 0.069 miles northeast of the subject site. This property is currently developed as a parking lot for the University of South Florida - St. Petersburg. Regulatory records for this facility indicate that two (2) UST’s (one 3,000-gallon and one 4,000-gallon) were abandoned in place at the site. The former owner indicated that the empty tanks were filled with sand in 1987. No assessment records for this site were available for review. Groundwater flow maps from nearby assessed sites indicate that groundwater flows to the southwest, towards the subject property. Based on the potential that these UST’s may have had historic leaks and no assessment records were available for review, this site is considered a REC at this time.

The remaining sites listed on the EDR Radius Search were either too distant from the subject site or located in a down-hydrologic gradient direction, and are therefore not believed to represent Recognized Environmental Conditions (RECs).
5.12 Additional Environmental Record Sources
Property Cards and Property Appraiser information for the subject site were viewed in order to determine the information about the subject site, age of any structures that may be present on-site and any environmental concerns that may be evident. Property cards for the site are included in Appendix VI.

Abandoned Dump Site: Greenfield Environmental discovered no evidence during the course of this Phase I ESA to indicate the presence of an abandoned dump site on or adjacent to the subject property.

5.13 Physical Setting
The elevation of the site is approximately five (5) feet above sea level and the groundwater flow appears to be to the south/southeast. The surface topography in the area consists of a level grade. Various surface and subsurface features, groundwater withdrawals and seasonal fluctuations in rainfall can affect groundwater depth and direction.

The N.R.C.S. National Cooperative Soil Survey (Web Soil Survey 2.0) identifies the surficial soils at the subject property is Urban Land-Astatula and Wabasso Soils complex. A detailed soil map for the subject property is included in Appendix VI.

Hydrology / Groundwater Characteristics
Groundwater flow direction in the surficial aquifer generally conforms with area topographic relief. Discharge areas are generally in creeks, lagoons, intercostal waterways, bays and Tampa Bay. Groundwater recharge within the surficial aquifer occurs primarily from downward infiltration of precipitation.

The water table of the surficial aquifer is typically located at depths ranging from 8 feet to 10 feet below land surface, however, the water table may be influenced by occurrences such as local rainfall, pumping, and drainage control measures implemented by the Southwest Florida Water Management District.

Based on the St. Petersburg, Florida U.S.G.S. Quadrangle Map (photorevised 1987) as shown in Appendix VI, the elevation of the site is approximately 5 feet above sea level. The direction of groundwater flow in the surficial aquifer is most likely to the south/southeast, based on the U.S.G.S. Quadrangle Map, although groundwater flow from assessments conducted nearby the subject site show the groundwater direction flow to be to the southwest.

5.14 Historical Use Information on the Subject Property and/or Adjoining Properties
Aerial Photograph Review
Aerial photographs were examined for the purpose of determining whether the property and adjacent properties have been used for industrial or landfill purposes, if any obvious detrimental uses of the subject property could be ascertained and to observe development trends in the area.

1926: The subject site and its surrounding areas appear as developed land, but due to the poor quality of the photograph, no discernible features about the site and its surroundings were identified.

1952-1991: The subject site appears developed with trailer homes on the west end of the site and motel/apartment structures on the east end. The properties to the west (across Brooker Creek) appear as single family residences. The properties to the south (across Brooker Creek) appear as an apartment building and a strip mall. These structures still exist at these locations today. The property to the southeast (across 4th St. S. and Brooker Creek) appears as a utility transformer station, which still exists there today. The property to the east (across 4th St. S.) appears developed with several large commercial structures. The property to the northeast (across 4th St. S. and 11th Ave. S.) appears as a service station. The properties to the north (across 11th Ave. S.) appear as single family residences and a commercial structure at the NE corner. These structures still exist at these locations today.

1993-2002: The subject site first appears as vacant land in the 1993 aerial photograph. The residential properties to the west and the former service station to the northeast first appear as vacant land in the 2002 aerial photograph.

2005-2013: The subject site appears as a construction staging lot for All Children’s Hospital. The properties to the east first appear as vacant land in the 2007 aerial photograph and then as a road construction staging lot in the 2009 aerial photograph.

The subject site and its surroundings appear today much as they did in the 2013 aerial photograph, although the subject site is no longer being utilized as a construction staging lot. No trailers or equipment were viewed on the subject site during the site inspection.

After close examination of all the aerials listed above, it was concluded that there is no evidence of dumping and or landfill activity associated with the subject property or adjacent properties in the vicinity. The subject site appears to have been developed as early as 1926.

Sanborn Fire-Insurance Map Review
An extensive on-line collection of Sanborn Maps is available through the Florida Public Library System. Sanborn Fire Insurance Maps were used by insurance companies to determine potential fire hazards for specific buildings. This was accomplished by color coding building construction, labeling automatic sprinkler systems, fire hydrants, and gas tanks as well as facilities that may

Greenfield Environmental, Inc.
contain other flammable liquids.

This research revealed that Sanborn maps were available for the subject property for the years 1918, 1923, 1951, 1952 and 1966. The 1918 and 1923 Sanborn Maps shows no structures on the subject site and only limited residential development in the vicinity of the site. The 1951, 1952 and 1966 Sanborn Maps show the subject site developed with “The Colonials” apartments and trailer park. In addition, the property to the northeast appears developed with a “filling station” and the property to the east appears developed with a “laundry and drycleaners”.

**Historical City Directory Review**
Greenfield Environmental reviewed historical City Directories (since 1925) at the Pinellas County Public Library located in St. Petersburg, Florida. Address listings were as follows:

**1925-2005:**

The west portion of the subject site (418 & 420 11th Avenue South) was first listed as residences in the 1925-1935 city directories. It was then listed as the Klose-In Trailer Park in the 1945 to 1985 city directories.

The east portion of the subject site (1101 4th Street South) was listed as the Colonials Apartments in the 1945 to 1985 city directories. No listings for the subject site were identified after the 1985 listing.

The adjacent property to the north (1041 4th Street South) was listed as an auto repair shop in the 1935-1940 city directories. No suspect listings for this address were identified after the 1945 listing.

The adjacent property to the northeast (1038 4th Street South) was listed as a service station in the 1954-1985 city directories. No suspect listings for this address were identified after the 1985 listing.

The adjacent property to the east (1160 4th Street South) was listed as a drycleaning plant in the 1954-1985 city directories. No suspect listings for this address were identified after the 1985 listing.

The adjacent property to the east (1166 4th Street South) was listed as auto repair shop in the 1954-1985 city directories. No suspect listings for this address were identified after the 1985 listing.

**50-Year Chain of Title**

No title search documentation for the subject property was provided to GE by our client, the City of St. Petersburg, in order to determine past owners of the site and to reveal publicly recorded ownership of the property. As a result, GE claims no liability for any information that may be contained in any Chain of Title documentation for the subject property.
6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions
The site inspection and reconnaissance was conducted on September 16, 2013 by Environmental Professionals (EP) Nick Eilerman and James Greenfield. The EP traversed all readily accessible portions of the subject property. It is important to note that all but an exhaustive investigation might fail to locate buried, covered over or localized surficial events of hazardous materials or wastes on-site that are not reasonably visible or suspected at the ground surface. The client should realize that the subject property, which in our opinion, did not exhibit evidence that toxic or hazardous wastes were at the ground surface during our site inspection and field work, except as qualified herein, could later be impacted due to natural phenomena, human intervention, on-site pollution sources or contamination due to adjacent properties. These occurrences are beyond our control. Greenfield Environmental assumes that there are no hidden or unapparent environmental conditions of the site, subsoil, groundwater, structures or surroundings which would have an adverse effect on the subject property whether the source is on-site, adjacent properties, or properties in the nearby surrounding. This purpose of this Phase I ESA was not to provide an operational audit of any businesses at the site, if any, which would determine their compliance with regulatory requirements that may affect them. Greenfield Environmental or its representatives have conducted no off-site tests or evaluations of materials or substances found on the site for the purpose of assessing the presence of environmental Conditions not readily apparent during our visual observations made during the site visit. Information, estimates, and opinions furnished to Greenfield Environmental and its representatives, and contained in this report, were obtained from sources that are considered and assumed to be reliable, and believed to be true and correct. Greenfield Environmental and its representatives assumes no responsibility for any inaccuracies in such items which may be revealed as a result of subsequent action, either by Greenfield Environmental or others. These occurrences are beyond our control.

6.2 General Site Setting / Interior & Exterior Observations
On-Site Operations and Activities
Please refer to Section 3.3.

Underground/Aboveground Petroleum Storage Tanks
No regulated petroleum Underground Storage Tanks (USTs) or Aboveground Storage Tanks (ASTs) were observed on the subject property. No registrations for petroleum AST’s or UST’s were discovered during this ESA. Based on the residential nature of the property, the potential exists that an underground heating oil tank(s) may have been used and may still remain at the site.

Hazardous Substance or Petroleum Product Use, Storage and Disposal Practices
No hazardous substances or petroleum products are currently being stored at the vacant property.

Domestic Solid or Liquid Waste Disposal Practices
No solid or liquid waste is currently generated at the vacant property.

Greenfield Environmental, Inc.
**Odors**
No chemical, petroleum or any other foul odors were physically observed or noted during the site inspection.

**Pools Of Liquid**
No standing pools of liquid (other than water) were physically observed or noted during the site inspection. A small excavation pit was observed at the north end of the property’s right-of-way where the sidewalk had been removed.

**Limited Polychlorinated Biphenyls (PCBs) Survey**
Our representative conducted a limited site survey for the presence of PCB-containing or PCB-contaminated equipment consisting of visual observations for the presence of transformers, capacitors, and hydraulic equipment. Dielectric fluid and hydraulic oils containing PCBs was widely used in such equipment until 1979 when the U.S. EPA restricted such use. It is thought that most PCB production ceased around 1972. Many utilities, have since acted to replace PCB-containing and PCB-contaminated transformers and capacitors.

No transformers, capacitors or hydraulic equipment (elevators, in-ground lifts, etc.) were observed on-site by our representative during the limited PCB-survey.

**Impacted Soil or Distressed Vegetation**
The subject property and all readily accessible areas of the subject site were traversed by a representative from Greenfield Environmental. Soils and vegetation on the subject property and peripheral areas were observed for visual and olfactory signs of degradation by hazardous substances and or petroleum products. No evidence of soil and vegetative distress or degradation was observed by the representative during the site inspection. No evidence of waste dumping, such as stockpiled debris, mounds, or depressions were observed on the subject property.

**Drains / Sumps**
No evidence of drains or sumps were observed by the representative during the site inspection.

**Stained Concrete or Asphalt**
No evidence of significant stained asphalt or concrete was observed by the representative during the site inspection.
7.0 INTERVIEWS

As part of this Phase I ESA, Greenfield Environmental interviewed several individuals in order to collect additional information concerning historical and present uses of the subject property.

7.1 Interview with Owner
Pursuant to ASTM E 1527-05, user supplied information in the form of User Questionnaires were forwarded to Greenfield Environmental. These questionnaires can be found in Appendix VIII. The questionnaires were completed by Mr. Mike Psarakis, Senior Real Estate Coordinator with the City of St. Petersburg, and Mr. Scott Nolin, Executive Director of Facilities Management at All Children’s Hospital. The questionnaires did not reveal any issues that would indicate Recognized Environmental Conditions (REC’s). The users have not disclosed any specialized knowledge pertaining to the subject property or surrounding areas or properties that might be material to identifying any Recognized Environmental Conditions in connection to the subject site.

7.2 Interview with Site Manager
None.

7.3 Interview with Occupants
None.

7.4 Interview with Local Government Officials
None.

7.5 Interview with Others
See Section 4.1.
8.0 FINDINGS / OPINIONS / CONCLUSIONS & RECOMMENDATIONS

Based on the standardized research methods and resultant information contained within this Phase I Environmental Site Assessment, Greenfield Environmental has identified the following Recognized Environmental Conditions (RECs) in accordance with the 2005 EPA’s Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. An REC being defined by the AAI standard as an identified conditions indicative of releases or threatened releases of hazardous substances, and in the case of inquiries conducted for persons identified in §312.1(b)(2), conditions indicative of releases and threatened releases of pollutants, contaminants, petroleum and petroleum products, and controlled substances (as defined in 21 U.S.C. 802) on, at, in, or to the subject property.

POTENTIAL CONTAMINATION DUE TO SOURCES LOCATED ON THE SUBJECT PROPERTY:
Hazardous substance contamination: No Recognized Environmental Conditions Identified
Petroleum product contamination: No Recognized Environmental Conditions Identified

POTENTIAL CONTAMINATION DUE TO SOURCES LOCATED ON ADJACENT PROPERTIES:
Hazardous substance contamination:
Petroleum product contamination:
One (1) Recognized Environmental Conditions Identified
Three (3) Recognized Environmental Conditions Identified

POTENTIAL CONTAMINATION DUE TO SOURCES LOCATED WITHIN ¼-MILE RADIUS:
Hazardous substance contamination: No Recognized Environmental Conditions Identified
Petroleum product contamination: No Recognized Environmental Conditions Identified

De Minimis Conditions
No de minimus conditions with respect to the subject property were discovered during this Phase I ESA. These observances are not considered to be REC’s as defined by the EPA’s AAI Standard.

OPINIONS
Greenfield Environmental has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of the EPA’s AAI Standard at/on the subject property (Vacant Land located at 1101 11th Avenue South in St. Petersburg, Florida). Any exceptions to, or deletions from, this practice are described in this report. This assessment has revealed no evidence of Recognized Environmental Conditions (REC’s) in connection with the property.

CONCLUSIONS / RECOMMENDATIONS
Based upon the REC’s identified within Section 1.0 of this report, Greenfield Environmental recommends that additional investigation be conducted at the subject site.
9.0 ADDITIONAL SERVICES

The following non-scope considerations were not performed as part of this Phase I ESA, and are not requirements of the EPA's AA1 Standard or the ASTM E 1527-05 Practice; Asbestos Containing Materials (ACM), Radon, Lead-Based Paint, Lead In Drinking Water, Wetlands, Regulatory Compliance, Cultural And Historic Resources, Industrial Hygiene, Health & Safety, Ecological Resources, Endangered Species, Indoor Air Quality, Biological Agents and Mold.

The client may wish to assess the above issues in connection with a commercial real estate transaction. No implication is intended as to the relative importance of inquiry into such Non- Scope Considerations, and this list is not intended to be all inclusive.

Definitions:

- **Adjacent Property** includes those sites separated from the subject property by an easement such as a street, highway, railroad, etc., which would otherwise be immediately adjoining the subject site.

- **Capacitor** - a device for accumulating and holding a charge of electricity and consisting of conducting surfaces separated by a dielectric (40 CFR 761.3); may contain a dielectric that contains PCB’s.

- **Contamination** means a non-permitted release of a hazardous substance, petroleum substance or product or polychlorinated biphenyl in sufficient quantity to cause damage to natural resources.

- **Hazardous Substance** means those substances as defined by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. 9601 (14), and includes any material that is toxic, flammable, explosive, or corrosive as these terms are defined by CERCLA. Excluded from this definition are petroleum substances or products as defined below.

- **Hazardous Waste** defined in RCRA (Section 1004(5)) as a solid waste, or a combination of solid wastes, which because of its quantity concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious, irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.

- **Not Observed** means no visual or olfactory evidence of contamination was noted during the site inspection.

- **Not Discovered** means no information regarding said contamination was obtained from persons interviewed and no information was discovered in the Regulatory records that were reviewed.

- **Non-PCB Containing** means that the dielectric fluid in the electrical unit contains less than 50 ppm of PCB’s.

- **Poly-Chlorinated Biphenyl’s (PCB’s)** - a mixture of compounds composed of the biphenyl molecule which has been chlorinated to varying degrees or any combination of substances which contains such substances (40 CFR 761.3). A suspected human carcinogen.

- **PCB Contaminated** means that the fluid in the electrical unit contains between 50 to 499 ppm of PCB’s.

- **PCB Transformer** means that the dielectric fluid in the electrical unit contains over 500 ppm of PCB’s.

- **Petroleum Substance or Product** means any material containing refined or crude oil, or any fraction thereof, and includes natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel, or mixtures of natural gas and such synthetic gas. Hazardous substances as defined above are excluded.

- **Release** means such occurrences as defined by CERCLA, 42 U.S.C. 9601 (10), and includes any intentional or accidental discharging, spilling, leaking, pumping, pouring, emitting, injecting, escaping, leaching, dumping or disposing into the environment.

- **Transformer** - devises that change (transform) one potential difference (voltage) to another. Typically transformers contain a dielectric fluid that has the potential to contain PCB’s if the unit was manufactured before 1979; however, it is thought that most PCB production was ceased by 1972.

- **EPA** means the Environmental Protection Agency

- **FDEP** means the Florida Department of Environmental Protection
11.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS (EP’S)

“I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in Sec. 312.10 of 40 CFR 312. I have the specific qualifications based education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.”

MR. NICK EILERMAN - PROJECT MANAGER

Mr. Eilerman holds a Bachelor of Science degree in Environmental Science & Policy from the University of South Florida- St. Petersburg. Mr. Eilerman has environmental-related work experience since 2005 and experience in assessing the risks associated with real-property transactions since 2006.

MR. JAMES E. GREENFIELD - PRINCIPAL

Mr. Greenfield holds a Bachelor of Arts degree in Biology from the University of South Florida. Mr. Greenfield has environmental-related experience in assessing the risks associated with real-property transactions since 1989.
12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS (EP'S)

The discussions and conclusions contained in this Phase I ESA report have been reviewed by James E. Greenfield with Greenfield Environmental. This Phase I ESA was performed under the direct supervision of one or more of the Environmental Professionals (EP's) listed below and is found to conform to standard practices pursuant to the 2005 EPA's Final All Appropriate Inquiry (AAI) Standard (40 CFR 312) and in compliance with the American Society for Testing and Materials (ASTM) Practice E-1527-05. The professional services discussed herein have been performed using that degree of care and skill ordinarily exercised under similar circumstances by other scientists practicing in this field.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS
Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.
STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site, it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/29/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

</tbody>
</table>

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/18/2013 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 07/15/2013 has revealed that there are 20 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, and dated 04/09/2013 has revealed that there are 8 UST sites within approximately 0.25 miles of the target property.

## ADDITIONAL ENVIRONMENTAL RECORDS

**Local Lists of Hazardous waste / Contaminated Sites**

FI Sites: This summary status report is a compilation and revision of other existing lists. It was developed from a number of lists including the Eckhardt list, the Moffit list, the EPA Hazardous Waste Sites...
EXECUTIVE SUMMARY

list, EPA’s Emergency and Remedial Response Information System list (RCRA Section 3012), and existing department lists such as the Obsolete Uncontrolled Hazardous Waste Sites list. The purpose of this list is to track the progress of activities within and outside the department as they relate to the listed sites. It is not a list of uncontrolled sites or sources causing environmental contamination. The Sites List comes from the Department of Environmental Protection.

A review of the FI Sites list, as provided by EDR, and dated 12/31/1989 has revealed that there are 2 FI Sites sites within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/18/2013 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 22 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAinfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data Maintenance (FDM) system maintains entity, environmental interest and affiliation data for the State of Florida.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource
Conservation and Recovery Act (RCRA) program through the tracking of
events and activities related to facilities that generate, transport,
treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
program staff to track the notification, permit, compliance, and
corrective action activities required under RCRA.

Florida Environmental System Today Application (FIESTA) Data
Maintenance (FDM) system maintains entity, environmental interest and
affiliation data for the State of Florida.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

**STANDARD ENVIRONMENTAL RECORDS**

**Federal NPL site list**

**NPL:** National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

| Date of Government Version: 04/26/2013 | Source: EPA |
| Date Data Arrived at EDR: 05/09/2013 | Telephone: N/A |
| Date Made Active in Reports: 07/10/2013 | Last EDR Contact: 07/12/2013 |
| Number of Days to Update: 62 | Next Scheduled EDR Contact: 10/21/2013 |
| Data Release Frequency: Quarterly |

  Telephone 206-553-8665

**Proposed NPL:** Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| Number of Days to Update: 62 | Next Scheduled EDR Contact: 10/21/2013 |
| Data Release Frequency: Quarterly |

**NPL LIENS:** Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013  Source: EPA

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013  Source: EPA
Date Data Arrived at EDR: 05/29/2013  Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013  Last EDR Contact: 08/30/2013
Number of Days to Update: 72  Next Scheduled EDR Contact: 12/09/2013
Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information Listing
A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration andReuse Office is involved in cleanup activities.

Date of Government Version: 07/31/2012  Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2012  Telephone: 703-803-8704

Number of Days to Update: 72  Next Scheduled EDR Contact: 10/21/2013
Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time.

This decision does not necessarily mean that there is no hazard associated with a given site. It only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.
Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 08/10/2013

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Federal institutional controls/engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List
A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter the environment or affect human health.

- Date of Government Version: 03/14/2013
- Date Data Available at EDR: 03/29/2013
- Date Made Active in Reports: 05/19/2013
- Number of Days to Update: 42

- Last EDR Contact: 09/10/2013
- Next Scheduled EDR Contact: 12/23/2013
- Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls
A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

- Date of Government Version: 03/14/2013
- Date Data Available at EDR: 03/29/2013
- Date Made Active in Reports: 05/19/2013

- Next Scheduled EDR Contact: 10/14/2013
- Data Release Frequency: Annually

State-tribal - equivalent CERCLIS

SHWS: Florida’s State-Funded Action Sites
State Hazardous Waste Sites. State hazardous waste site records are the states’ equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

- Date of Government Version: 02/01/2013
- Date Data Available at EDR: 02/26/2013
- Date Made Active in Reports: 09/13/2013
- Number of Days to Update: 15
- Source: Department of Environmental Protection
- Telephone: 850-488-0190
- Last EDR Contact: 08/27/2013
- Next Scheduled EDR Contact: 12/09/2013
- Data Release Frequency: Semi-Annually
State and tribal landfill and/or solid waste disposal site lists

SWLF: Solid Waste Facility Database
Solid Waste Facilities/Disposal Sites. SWLF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 07/22/2013
Date Data Arrived at EDR: 07/22/2013
Date Made Active in Reports: 08/12/2013
Number of Days to Update: 21

State and tribal Brownfields sites

BROWNFIELDS: Brownfield Areas
Brownfields are abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. Florida's Brownfields Redevelopment Act primary goals are to reduce health and environmental hazards on existing commercial and industrial sites that are abandoned or underused due to these hazards and create financial and regulatory incentives to encourage voluntary cleanup and redevelopment of sites.

Date of Government Version: 07/08/2013  
Date Data Arrived at EDR: 07/09/2013  
Date Made Active in Reports: 08/07/2013

Next Scheduled EDR Contact: 10/21/2013  
Data Release Frequency: Semi-Annually

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfield Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2013
Date Data Arrived at EDR: 03/12/2013
Date Made Active in Reports: 05/10/2013

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

- Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites
The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.
CONSENT: Superfund (CERCLA) Consent Decrees
Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

ROD: Records Of Decision
Record of Decision: ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US MINES: Mines Master Index File
Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

TSCA: Toxic Substances Control Act
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.
Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 09/29/2010

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The
information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA
(Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions
are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters
with updated records, it was decided to create a HIST FTTS database. It included records that may not be included
in the newer FTTS database updates. This database is no longer updated.
Date of Government Version: 10/19/2005

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all
registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March
1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices
being produced, and those having been produced and sold or distributed in the past year.
ICIS: Integrated Compliance Information System
The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement
and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES)
program.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  Source: EPA
Date Data Arrived at EDR: 07/03/1995  Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995  Last EDR Contact: 06/02/2006
Number of Days to Update: 35  Next Scheduled EDR Contact: 09/01/2008
Data Release Frequency: No Update Planned

RMP: Risk Management Plans
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

FL Cattle Dip Vats: Cattle Dipping Vats
From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

**EPA Watch List: EPA Watch List**

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, resin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Marine Facilities Operating Permit
What is this permit used for? Miami-Dade County Ordinance 89-104 and Section 24-18 of the Code of Miami-Dade County require the following types of marine facilities to obtain annual operating permits from DERM: All recreational boat docking facilities with ten (10) or more boat slips, moorings, davit spaces, and vessel tie-up spaces. All boat storage facilities contiguous to tidal waters in Miami-Dade County with ten (10) or more dry storage spaces including boatyards and boat manufacturing facilities.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data
- Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

  - Data Release Frequency: Annually
Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals
Source: American Hospital Association, Inc.
Telephone: 312-280-5591
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Department of Children & Families
Source: Provider Information
Telephone: 850-488-4800

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Environmental Protection
Telephone: 850-245-8238

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.
EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
**GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

**HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downstream sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

**FEMA FLOOD ZONE**

Target Property County: PINELLA, FL

FEMA Flood Electronic Data: YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 12103C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

**NATIONAL WETLAND INVENTORY**

NWI Quad at Target Property: SAINT PETERSBURG

NWI Electronic Data Coverage: YES - refer to the Overview Map and Detail Map

**HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downstream sites might be impacted.

*Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles

Status: Not found

**AQUIFLOW**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

</table>
GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5’ Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5’ Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5’ Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
   Source: EPA/Office of Drinking Water
   Telephone: 202-564-3750
   Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
   Source: EPA/Office of Drinking Water
   Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
   This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Florida Sinkholes
Source: Department of Environmental Protection, Geological Survey
The sinkhole data was gathered by the Florida Sinkhole Research Institute, University of Florida.

Oil and Gas Permit Database
Source: Department of Environmental Protection
Telephone: 850-245-3154
Locations of all permitted wells in the state of Florida.

RADON

State Database: FL Radon
Source: Department of Health
Telephone: 850-245-4288
Zip Code Based Radon Data

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX VIII

USER QUESTIONNAIRE
Greenfield Environmental Project No.: 1001-6308

RE: USER PROVIDED INFORMATION QUESTIONNAIRE - Parcel "B" Property -
SW Corner of 11th Ave. S. & 4th St. S. - Parcel ID #'s
30/31/17/77418/000/0010 & 30/31/17/77400/000/0010 - St. Pete, FL

To whom it may concern:

As part of the new All Appropriate Inquiry (AAI) guidelines for completing a Phase I Environmental Site Assessment, it is required that the “user” of the report to answer various questions. Please provide answers (to the best of your knowledge) to the following questions. Your answers will be incorporated into the Phase I Environmental Site Assessment Report we are completing for the subject property. Please sign and return this questionnaire to our office when completed.

1) Are you aware of any Environmental Cleanup Liens against the property that are filed or recorded under federal, tribal, state, or local law?

NO

2) Are you aware of any activity and or Land Use Limitations such as Engineering Controls, Land Use Restrictions or Institutional Controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state, or local law?

NO

3) Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

YES

5) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,
(a) Do you know the past uses of the property?
   NO

(b) Do you know of specific chemicals that are present or once were present at the property?
   NO

(c) Do you know of spills or other chemical releases that have taken place at the property?
   NO

(d) Do you know of any environmental cleanups that have taken place at the property?
   NO

6) Based on your knowledge and experience related to the property, are there any obvious indications that point to the presence or likely presence of contamination at the property?
   NONE

Please provide answers (to the best of your knowledge) to the following questions. Your answers will be incorporated into the Phase I Environmental Site Assessment Report we are completing for the subject property. Please sign and return this questionnaire to our office when completed.

1) Are you aware of any Environmental Cleanup Liens against the property that are filed or recorded under federal, tribal, state, or local law? [ ] Yes [ ] No.

2) Are you aware of any activity and or Land Use Limitations such as Engineering Controls, Land Use Restrictions or Institutional Controls that are in place at the property and/or have been filed or recorded in a registry under federal, tribal, state, or local law? [ ] No.

3) Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? [ ] No. Previous Phase I ESA & Geotech provided to City.

4) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? [ ] Yes

5) Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, [ ] Refer to ESA report provided.

432 3rd Street North, St. Petersburg, FL 33701 • Phone: 727.896.1266 • Fax: 727.896.1566
(a) Do you know the past uses of the property?  
   - Refer to ESA Report provided.

(b) Do you know of specific chemicals that are present or once were present at the property?  
   - Refer to ESA Report provided

(c) Do you know of spills or other chemical releases that have taken place at the property?  
   No. Refer to ESA Report provided.

(d) Do you know of any environmental cleanups that have taken place at the property?  
   No.

6) Based on your knowledge and experience related to the property, are there any obvious indications that point to the presence or likely presence of contamination at the property?  
   No.
